## (b) Amendments to the Claims:

Please cancel claims 1-15 and 17 without prejudice or disclaimer, amend claim 16 and add new claim 18.

A detailed listing of the claims follows which replaces all earlier versions.

1.-15. (Cancelled).

16 (Currently Amended) A process for producing a three-dimensional pattern, which comprises the steps of :

preparing plural kinds of liquid compositions each comprising a block polymer having a polyalkenyl ether repeating unit structure and a liquid medium;

ejecting a first of the plural kinds of liquid compositions to apply the liquid composition to a recording medium;

imparting a <u>thermal</u> stimulus to the applied liquid composition to modify the block polymer <u>increase the viscosity of the liquid composition</u>, thereby forming a <u>three-dimensional basic</u> pattern; <u>and</u>

imparting an electromagnetic wave stimulus to the formed threedimensional basic pattern to form a pattern; and

ejecting a second of the plural kinds of liquid compositions which has a different color than differs from the first liquid composition to apply the liquid composition onto the pattern.

## 17. (Cancelled).

18. (New) The production process according to claim 16, wherein the liquid compositions having different colors are a water-based liquid composition and an oil-based liquid composition.
